

AMLAN KASHYAP

Project Engineer — Electrical Transmission & Substation Projects

Electrical Engineer · B.E (Electrical Eng) · M.Tech (Electrical Power Systems)

+91 93879 75760

✉ amlanrickyaec77@gmail.com

📍 Guwahati, Assam

Electrical Supervisory License holder (HT, 33 kV)

PROFILE

Summary

Electrical project engineer with hands-on execution and procurement experience across 132 kV substations and transmission lines for AEGCL, APDCL, BHEL & NTPC. Backed by an M.Tech in Power Systems (1st Class with Honours) and a published international research paper.

EXPERIENCE

Work Experience

Lead Project Manager — Execution & Procurement

Mega Electricals · Full-time

Project manager for the complete execution and monitoring of AEGCL and APDCL transmission and substation projects.

- ▶ Construction of a new 132 kV bay extension at the 132/33 kV Barnagar Grid Substation (AEGCL).
- ▶ Construction of a 132 kV single-circuit line on D/C towers connecting Barnagar Grid S/S to Sorbhog S/S (AEGCL).
- ▶ Integrated Power Development Scheme (IPDS) — Karbi Anglong & Hamren (APDCL).

APDCL

132 kV Bay Extension

D/C Transmission Line

IPDS

Project Engineer — Operations, Execution & Procurement

N.K. Engineering Works · Full-time

Owned tender intelligence, bid submission and end-to-end project support across APDCL, BHEL and NTPC projects — from vendor approval to project closure.

- ▶ Explored tender notifications; arranged vendor-approval documents and prepared / submitted bids with clients.
- ▶ Circulated Work Orders, Scope of Work, TCC, GCC & SCC to project teams and stakeholders.
- ▶ Procured materials per scope & approved specifications; ensured resource availability.
- ▶ Single point of contact for working groups; managed escalation, billing & timely project closure.

EDUCATION

Academic Foundation

M.Tech — Electrical Engineering (Power Systems)

Assam Engineering College (AEC)

2021 – 2023 · **78.47%** · **1st Class with Honours**

B.E — Electrical Engineering

Assam Engineering College (AEC)

2011 – 2015 · **66.24%** · **1st Class**

PROJECTS

Academic Project

Power Quality Assessment using Wavelet Transform & a Substation Reliability Case Study

Final-year project · Assam Engineering College

- ▶ **7th Sem:** Study of power-quality disturbances using MATLAB; analysis using DWT & DT-DWT.
- ▶ **8th Sem:** Neural network to classify disturbances; reliability case study of 33/11 kV Ulubari S/S (APDCL).

Neural Networks

Wavelet Transform

RESEARCH

Published Paper

An Improved Control Strategy for Reactive-Power Compensation & Voltage Regulation in Modern Distribution Networks

International Journal · Peer-reviewed

Advanced controller design for power-factor correction and demand-side management on the load side, benchmarked against a conventional smart-grid compensation approach.
